

Phase II Report

Vital Signs Monitoring Plan

Southwest Alaska Network

Alan J. Bennett
Southwest Alaska Network Coordinator
National Park Service
240 West 5th Avenue #114
Anchorage, AK 99501

Karen L. Oakley
Alaska Science Center
US Geological Survey
1011 E. Tudor Rd. MS 701
Anchorage, AK 99503

Dorothy C. Mortenson
Southwest Alaska Network Data Manager
National Park Service
240 West 5th Avenue #114
Anchorage, AK 99501

September 30, 2004

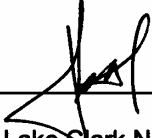

Phase II Report Vital Signs Monitoring Plan Southwest Alaska Network

Board of Directors, Approval Signatures

Anne Castellina
Superintendent, Kenai Fjords National Park
3/24/04

Date

Joel Hard
Superintendent, Lake Clark National Parks and Preserve
3/17/04

Date

Joe Fowler
Superintendent, Katmai/Aniakchak/Alagnak National Park and Preserve
3/8/04

Date

Sara Wesser
Regional Inventory and Monitoring Coordinator, Alaska Region

PREFACE/	vii
EXECUTIVE SUMMARY.	viii
Chapter 1. INTRODUCTION AND BACKGROUND	
A. The Importance of Long-term Monitoring.	1
B. NPS Policies and Mandates That Link Monitoring and Management of Parks: Who is interested in the information provided by monitoring and why?.	2
Applications of Information Gained from Monitoring	5
C. Southwest Alaska Network- Environmental Setting and Park- Specific Mandates: What physical and biological features make these park units special?	6
1) Dynamic Landform Processes and Pattern	7
2) Marine Coastline	8
3) Aquatic Systems, Anadromous Fish, and Ecological Interrelationships	9
4) Wilderness-dependent Species and Species Interactions	10
5) Ecoregion and Biological Diversity	10
D. Formation of the Network and Approach to Planning.	11
E. Monitoring Goals, Objectives and Questions.	16
F. Conceptual Foundation for Monitoring.	21
1) <u>Landscape-based Monitoring</u> : <i>Why is it important to have a landscape perspective?</i>	21
a) <i>Time Principle</i>	22
b) <i>Place Principle</i>	23
c) <i>Disturbance Principle</i>	24
d) <i>Species Principle</i>	24
2) <u>Issues-oriented Monitoring</u> : <i>What are the most important resource protection and scientific issues in the network?</i>	26
Chapter 2. CONCEPTUAL MODELS	
A. Introduction	28
B. Landscape Drivers of Change	30
1. Climate and Landform	30
2. Landscape-scale Disturbances	33
3. Biotic Interactions	36
4. Human Activities (Stressors)	39
C. Ecosystem Interactions	48
D. Conclusions	52
Chapter 3. SELECTION AND PRIORITIZATION OF VITAL SIGNS	
A. Introduction	55
B. Vital signs Selection	56
1). Framework	

2). Identification and Organization	57
3). Prioritization of Vital Signs	60
C. Conclusions	68
D. Plans for Phase III	68
<i>Phase III Report (December 2005)</i>	
Chapter 4. Sampling Design	
Chapter 5. Sampling Protocols	
Chapter 6. Data Management	
Chapter 7. Data Analysis and Reporting	
Chapter 8. Administration/Implementation of the Monitoring Program	
Chapter 9. Schedule	
Chapter 10. Budget	
Chapter 11. Literature Cited	
ACKNOWLEDGMENTS	69
GLOSSARY	71
LITERATURE CITED	74
APPENDIXES A-K (contents)	81
A. Network Park Ecological Profiles	
B. Resource Management Issues Summary	
C. Past and Present Resource Monitoring Summary	
D. Monitoring by Other Agencies and Partnership Opportunities	
E. Scoping Workshop Notebooks	
F. Scoping Workshop Summaries	
G. Food Webs	
H. Data Mining Summary Report	
I. Network Maps	
J. Exotic Species Threats	
K. Vital Sign Descriptions	83
